

# Informasi bencana alam

<https://www.bmkg.go.id/gempabumi/gempabumi-realtime>

The screenshot shows the BMKG Real-time Earthquake Information website. The browser address bar displays [www.bmkg.go.id/gempabumi/gempabumi-realtime](https://www.bmkg.go.id/gempabumi/gempabumi-realtime). The page header includes the date "KAMIS, 20 NOVEMBER 2025" and the time "STANDAR WAKTU INDONESIA 11:12:46 / 04:12:46 UTC". The BMKG logo and name "BADAN METEOROLOGI, KLIMATOLOGI, DAN GEOFISIKA" are visible on the left. A navigation menu contains "Profil", "Cuaca", "Iklim", "Kualitas Udara", "Gempa Bumi", and "Geofisika". A "Contact Center 196" button is on the right. The main content area features a breadcrumb "Beranda > Gempa Bumi > Real-time" and a large heading "Gempa Bumi Real-time" with the subtitle "Informasi gempa bumi real-time terbaru di wilayah Indonesia". Below this are five filter buttons: "Terkini", "M 5,0+", "Dirasakan", "Berpotensi Tsunami", and "Real-time". A warning box with a yellow triangle icon and the text "Penafian!" states: "Dalam beberapa menit pertama setelah gempa bumi, parameter gempa bumi dapat berubah dan boleh jadi belum akurat, kecuali telah direvisi atau dianalisis ulang oleh ahli seismologi." At the bottom, a map of Indonesia is shown with a red dot indicating an earthquake location. A "Terkonfirmasi" button and the timestamp "20 Nov 2025, 11:03:32 WIB" are also visible.
